

SECURE COPY 6.0

is NOW Available!

[Download Now!](#)

ScriptLogic and Quest are pleased to announce exciting news about the latest release of [Secure Copy](#), the safe and easy way to migrate your data. Version 6.0 introduces significant enhancements to the user interface, usability, performance, data migration and logging – providing greater value out-of-the-box. Secure Copy's **brand new reporting** makes post-migration analysis easy – access predefined reports with a single mouse click. Finally, a number of new enhancements to job management provide an improved user experience.

What's New in Secure Copy 6.0?

- **Bandwidth Throttling** – Control the performance of transfers across the network
- **Volume Shadow Copy Support** – Ensure all data can be migrated online 24x7
- **Enhanced Platform Support** – Now available in 64 bit and 32 bit versions
- **Predefined Reports** – Grab hold of your migrations with Post-Migration reporting
- **Powerful Report Viewer** – Gain more control over report output (e-mail, export and more)
- **Job Logging** – Empower your data migrations with Post-Migration Analysis
- **Job Performance** – Graphical speedometer and chart show total speed and data processed
- **Job Status** – Easily get an overview of all your copy jobs at a bird's eye view
- **Context Sensitive Help** – Simply press F1 or click the help button
- **Job Options** – Organized logical categories for easy navigation
- **Import Job** – Secure Copy 5.x jobs can be imported to retain your jobs and their schedules
- **Job Purge** – New functionality to allow purging job log files based on age
- **Redesigned UI** – Secure Copy can now be resized and maximized to full screen
